Eastern Promise

2

Eastern Promise are heavy gauge hollow stair rods in 5/8" (16mm) diameter and have a range of imposing finials available.

Perfect for a grand staircase, but equally at home on a standard staircase.

With the various combinations of rod and finial style you can achieve the perfect finish for your staircase.

Premier Rods

Our Premier range stair rods are the epitome of quality and style and they are manufactured using traditional methods. The finial is machined onto the rods meaning every rod is one piece, made to measure and unique. The rods are then polished and lacquered to the highest standard.

Crystal

Our Crystal range feature a finely cut crystal which catches the light and creates a dramatic effect. The rod itself is tubular and 1/2" diameter. All finial and rod colours can be mixed and matched. As an example, matching an amber crystal with an antique brass rod gives a period look, while a blue crystal on a satin nickel rod creates a modern, stylish look.

Tudor

Our Tudor range stair rods capture the style of classical wooden stair rods. These stair rods are made from the finest hardwood and are available in light oak or dark oak finishes. Tudor range stair rods come with solid brass tips and elegant brackets, making them a stylish alternative to our solid brass stair rods ranges. The hard wood we use will vary in grain pattern and shade.

Our Blacksmith range of wrought iron stair rods have been designed by award winning Northumbrian Blacksmith Rodney Brittain. Using traditional hot metalwork techniques, he has created a simplistic design that compliments a variety of interiors from rustic period properties to modern town houses. The rods are made from 1/2" (12mm) solid steel, individually beaten into shape and then given a protective coating to prevent rust. Ideal for runners and fitted carpets.

Jubilee

Launched to celebrate the Queen's Jubilee in 2012, these rods look great and are ideal for retro fitting as the 3/8" (9mm) rod can be easily cut down to match the width of an existing carpet. To save fitting time, the finials are already attached to the brackets. Brackets can easily accommodate underlay and gripper, unlike other budget rods sold online.

Victorian Stair Clip

In Victorian times, stair clips were a popular and fashionable accessory. However modern fitting methods sadly consigned them to history. We have revived this attractive product. Our stair clips are solid brass and we use traditional manufacturing methods to give them quality and authenticity. They will recreate the look of yesteryear and add a distinctive touch to your stairs.

Our Carpet Studs make a feature of newel posts and landings, especially when used in conjunction with Easybind. These are a nice detail when used on half landings to continue the runner effect, something that can be very difficult for the carpet fitter using traditional methods.

Our Skiffer corner protectors are an ornate solid brass casting designed to prevent damage to skirting boards and wall corners. It is all too easy to scuff corners, for example when vacuum cleaning or moving furniture. Our corner protectors not only prevent this, but also add an attractive detail to a normally bland area of the house.

The Premier Trim DoubleZ™9 is the perfect solution for joining standard pile carpets, but it does more. Easily converted into a Z bar it can now be used to transition between carpet and laminate, carpet to stone and other hard floors. As a Z bar it allows the laminate to float when used for carpet to laminate.

Choice of Length: 90cm (36"), 180 (71") and 270cm (106").

Also Available

DoubleZ™4 for thinner carpets.

DoubleZ™13 for thicker carpets.

The Premier Trim Two-Way Ramp is an ingenious product suitable for use on non porous floating floors and/or where underfloor heating is installed. Each ramp will accommodate two height differences by simply turning it around, so that gives four profiles covering height differences from 2mm to 9mm in 1mm increments. Ideal for laminates, engineered timber floors & LVT.

Choice of Profiles: 2-3, 4-5, 6-7 & 8-9mm.

Choice of Length: 90cm (36"), 180cm (71") and 270cm (106").

Premier Trim Finishes

Our high quality range of Premier door thresholds are mostly made from solid brass and offered in a choice of 10 different finishes. These options are achieved using a variety of manufacturing processes, including powder coating, plating, polishing and chemical antiquing and are hand-finished. Therefore, any given finish may vary slightly from batch to batch and compared to any given sample.
